Purpose and scope identification APOLO ontology

APOLO ontology purpose

The prompt engineering ontology aims to formalize knowledge about the creation and various types of prompts for the different large language models (LLMs) available by making it accessible to both experienced and less experienced users.

APOLO ontology scope

The ontology covers:
- Large language models (LLMs) available to users
- Prompt engineering techniques
- Task that can be solved using prompting techniques
- Examples of prompts specific to the large language model
